Subject: AK Steel and Suncoke

I got a call from the folks in the field this afternoon. It seems they were measuring some high benzene concentrations around AK.

They plan to use that GMAP monitor around neighborhoods at night, including around Suncoke Middletown. They asked about entry into Suncoke. I said that because we did not give you all notice, we should not enter. But, if they find something significant while monitoring, such as a major release event, I said they could go on site. I know Kerri Castlen is onsite with them today and I think they discussed Suncoke with her.

I hope this is ok with you, let me know if you disagree.
